

# AN INTRODUCTION TO THE OPEN SCIENCE FRAMEWORK (OSF) FOR JHU RESEARCHERS

## What is the OSF?

- A **free** and **open source** web application built to aid researchers in managing the entire scientific research workflow.
- A **collaboration tool** and a **project management tool** that is also a registry and a repository.
- It is designed with a **flexible interface** that allows you to **manage multiple projects** from a single dashboard.

## Why use the OSF?

- **To simplify and integrate** your workflow into one space.
- **To manage collaborative research** with version control and access control.
- **To share and register work** with both public and private options.
- **To organize** your Laboratory work and administrative processes.

*Service add-ons bring together documents, data, code, and related products that are stored in different spaces.*

## What are the benefits of using OSF for JHU?

- Institutional affiliation facilitates **greater recognition** for you, your collaborators, and JHU.
- Foster **serendipitous connections** for further collaboration

Name	Contributors	Modified
JHU Lab Organization Template	Boehm, Chiu	3 days ago
