

Workshop: Reproducible Research Practices and the Open Science Framework

There are many actions researchers can take to increase the openness and reproducibility of their work. Please join us for a workshop, hosted by [JHU Data Management Services](#) and the [Center for Open Science](#), to learn easy, practical steps researchers can take to increase the reproducibility of their work. The workshop will be hands-on. Using example studies, attendees will actively participate in creating a reproducible project from start to finish.

Information:

Date: Tuesday October 31, 2017

Time: 9:00 AM - 12:00 PM

Location: BLC 5015 / 5017

Homewood Campus

Topics covered:

- Project documentation
- Version control
- Pre-Analysis plans
- Open source tools like the Center for Open Science's [Open Science Framework](#) to easily implement these concepts in a scientific workflow.

This workshop is aimed at graduate students and postdocs, across disciplines, who are engaged in quantitative research. The workshop does not require any specialized knowledge of programming. Participants will gain a foundation for incorporating reproducible, transparent practices into their current workflows.

Speaker: Special Guest from the Center for Open Science and Reid Boehm, JHU Data Management Consultant

Attendees will need to bring their own laptop in order to fully participate.

Please RSVP at <http://jhu.libcal.com/event/3529686> as space is limited.
